Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-13 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 11 and 17 depend from non-existent claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10-12 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over admitted prior arts as provided on I.D.S. of 2-14-2006, JP 11-037486 in view of JP 11-311489. JP 11-037486 discloses an oil heater with upper and lower manifold pipes supplying oil for radiation of heat through radiation fins, Said fins are not in a single vertical plane. JP 11-037486 does not explicitly show a curved or convex portion towards a side. JP 11-311489 discloses a finned heat exchanger that explicitly shows a curved fin portion. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to use a curved fin as taught by JP-311489 with the device

of JP-037486 so as to provide a larger radiation portion and to also provide a retaining portion and to center a hole portion.

Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP 11-037486 in view of JP 11-311489 as applied to claims 10-13 and 17 above, and further in view of Naughton et al. U.S. Pat. 6,168,851. JP 11-037486 in view of JP 11-311489 does not show wheels. Naughton discloses a space heater that explicitly shows wheels. It would have been obvious to one of ordinary skill at the time of the claimed invention to put wheels on the invention of JP 11-037486 in view of JP 11-311489 so as to make the device portable.

Allowable Subject Matter

Claims 14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pollack and Reix are cited to show structure similar to the claimed invention.
